FIBER YARN FABRIC & HOME PRODUCTS FINISHED TEXTILES & APPAREL INDUSTRY SUPPORT

**COMPUTATION OF DUES FOR
FIBER, YARN AND FABRIC/HOME PRODUCTS COUNCILS**

MINIMUM DUES -- \$10,000 • MAXIMUM DUES -- \$250,000

Instructions: Use sales figures from your most recent calendar year or your most recently completed fiscal year. Dues are to be calculated on all net sales of textile product manufactured in the U.S. assessed at the rate in accordance with your sales volume (see table in #2 below). This is to include all internal company transfers of U.S. manufactured textile product to facilities domestic and offshore (see dues instruction sheet for more information on calculating sales).

In addition, all member companies are subject to \$10,000 minimum dues for calculations falling below that amount and maximum dues of \$250,000 for calculations exceeding that amount.

1) Total Textile Sales _____

2) Multiply Sales by (select multiplier below): _____

Sales Range	Multiplier	Sales Range	Multiplier
< \$30M	0.00038	\$100-200M	0.00035
\$30-50M	0.00037	\$200-1500M	0.00033
\$50-100M	0.00036		

3) **NCTO ANNUAL DUES** (\$10,000 min / \$250,000 max) \$ _____

FINISHED TEXTILES AND APPAREL COUNCIL DUES

Dues for full voting membership in the Finished Textiles and Apparel Council of NCTO are **\$10,000 per year**. Qualifying members are defined as companies or organizations that sew, knit and/or assemble, distribute, sale or otherwise transact any business related to finished textile and apparel goods.

INDUSTRY SUPPORT COUNCIL DUES

Dues for full voting membership in the Industry Support Council of NCTO are **\$6,500 per year**. Qualifying members—defined as companies or organizations that provide products or services to U.S. fiber and textile entities—include textile machinery manufacturers, dye and chemical suppliers, service providers, financial institutions, accounting and consulting firms, and other organizations that share a common interest in advancing the welfare of the U.S. fiber, yarn, fabric and finished textile manufacturers.

NATIONAL COUNCIL OF TEXTILE ORGANIZATIONS

- Dues Instructions for Calculating Textile Sales -

- 1) Use sales figures from your most recent calendar year or your most recently completed fiscal year. Dues are to be calculated on all net sales of textile product manufactured in the U.S. assessed at the rate reflective of your sales volume (select multiplier from ranges below).

Sales Range	Multiplier
< \$30M	0.00038
\$30-50M	0.00037
\$50-100M	0.00036
\$100-200M	0.00035
\$200-1500M	0.00033

- 2) Include both domestic and export sales from all plants and divisions of your company and from all subsidiaries in which the company owns more than 50%. If the reporting company is itself a subsidiary, include in your sales figures the textile sales of the parent corporation.
- 3) Include in the net textile sales the estimated sales value of textile products transferred within the company to non-textile divisions, such as apparel manufacturing divisions. This is to include all internal company transfers of U.S. manufactured textile product to facilities domestic and offshore. The estimated sales value of such transferred products should be based on an approximation of the value of a sale made to a customer outside the company in an arms-length transaction reflecting market prices.
- 4) The entry for textile sales should include, but not necessarily limited to, the following:
 - Fiber sales and transfers of all kinds
 - Yarn sales and transfers of all kinds and all fibers
 - Fabric sales and transfers of all kinds, including woven, knitted, non-woven, tufted, braided or other
 - Processing income from others, including commissions for bleaching, dyeing, printing, finishing, cutting & sewing (exclusive of garments), throwing, mercerizing, yarn processing, resin treatment, coating, laminating, etc.
 - Carpet and rug sales and transfers of all kinds
